ITA1412 – ETHICAL HACKING

EXPERIMENT NO. 10

Experiment Name

Batch File Execution

Aim

To create, save, execute, and edit a Windows batch file.

Commands

Example batch-file commands shown in the lab manual:

Command / Flag	Purpose	Example / Command
Echo off	Suppress command echoing	@echo off
Echo	Display text in the command window	echo hello
Pause	Wait for a key press	pause
Echo	Display another message	echo This is new
Echo	Display another message	echo this is second one

Procedure

Step 1: Open Notepad or another text editor.

Step 2: Enter the batch commands, placing each command on a new line.

Step 3: Save the file with a .bat extension, for example test.bat.

Step 4: Double-click the BAT file to run it.

Step 5: Right-click the file and choose Edit to modify it.
