ITA1412 – ETHICAL HACKING

EXPERIMENT NO. 7

Experiment Name

Vulnerability Analysis Using CGI Scanning with Nikto

Aim

To demonstrate web-server vulnerability scanning and CGI-directory checking with Nikto in an authorized test environment.

Commands

Commands shown in the lab manual (replace <website> with an authorized test target):

Command / Flag	Purpose	Example / Command
-H	Display Nikto help	nikto -H
-h	Specify a target host	nikto -h <website> -Tuning x
-Cgidirs	Check CGI directories	nikto -h <website> -Cgidirs all

Procedure

Step 1: Open a terminal window.

Step 2: Run nikto -H and press Enter.

Step 3: Run nikto -h <website> -Tuning x.

Step 4: Run nikto -h <website> -Cgidirs all.

Step 5: Review the directories and findings listed by Nikto.
